HA

SUMMARY

I am a proactive and skilled Front-End Developer with a BSc in Computer Science, specializing in creating responsive and intuitive web applications using ReactJS, Next, and other web technologies. My solid foundation in computer science equips me with strong problem-solving skills and a collaborative approach, essential for contributing effectively within dynamic teams. I am dedicated to crafting innovative digital solutions and continuously advancing my technical expertise

EXPERIENCE

Front-End Developer

Esdiac Global

📅 09/2024 - 01/1970   📍 Kano, Nigeria

A remote position focused on developing dynamic and responsive user interfaces

- Developed responsive, user-focused web applications using ReactJS, Tailwind CSS, and Figma designs
- Integrated Firebase services and complex APIs for secure authentication, real-time data handling, and enhanced functionality

Intern

Center of Information & Technology

📅 11/2020 - 06/2023   📍 Kano, Nigeria

An internship focused on supporting technical resources and maintaining network infrastructure

- Provided technical support and managed IT resources, ensuring smooth daily operations for staff and students
- Installed and maintained network infrastructure, including routers, switches, and Ethernet configurations

EDUCATION

BSc

Bayero University

📅 03/2019 - 04/2024   📍 Kano, Nigeria

PROJECTS

AgriSmart

📅 01/1970 - 01/1970   📍 N/A

AgriSmart project aimed at improving user accessibility through advanced technology

- Developed a disease detection API and Firebase for image storage, improving accessibility for users with a streamlined, user-centred design

Reclaim Hub

📅 01/1970 - 01/1970   📍 Kano, Nigeria

A web application designed to help students locate lost items within the school environment

- Worked on full-stack development, creating a secure database for lost items and an intuitive interface to enhance ease of use
